

66.4 MINUTES vs. 44 HOURS

Measured project window vs. modeled traditional human-equivalent midpoint.

OBSERVED WINDOW

66.4 min

Artifact timestamps — not compute time.

TRADITIONAL MIDPOINT

44 hrs

Modeled human-equivalent scenario.

REPLACEMENT MIDPOINT

\$3,291

Modeled labor cost — not savings.

Independent review:
PASS

Exact planning subject. Cash savings claimed: none. 500× remains a target, not a claim.

THE INTAKE

Build a 30-day public UBuildOS™ product campaign people can download, test, and inspect.

CAMPAIGN PLAN

30 days of public product releases.

PUBLIC-SAFE GITHUB

Only approved public outputs.

RIGHTS & ATTRIBUTION

Sources and ownership checked.

QUALITY & RECOVERY

Testing, restore, and evidence built in.

INDEPENDENT REVIEW

A separate reviewer can reject the result.

PUBLIC PROOF

Readers can inspect claims and assumptions.

THE FIRST VERSION FAILED

Independent review caught a real validator blind spot before publication.

01 FAIL

A checker could approve bad metadata.

02 PRESERVE

The failed version stayed intact.

03 REPAIR

The failure family and sibling cases were addressed.

04 PASS

The successor passed independent review.

THE RECEIPT

What is measured, what is modeled, and what is not claimed.

OBSERVED

66.4 min

Measured artifact window.

TRADITIONAL LABOR

28–64 hrs

Modeled range.

MIDPOINT LABOR

44 hrs

Modeled midpoint.

REPLACEMENT COST

\$2,091–
\$4,812

Modeled, not savings.

MIDPOINT COST

\$3,291

Modeled midpoint.

COMPRESSION

39.8×

Modeled midpoint scenario.

INTAKE → DONE

The human defines the outcome and material decisions. UBuildOS™ coordinates the work needed to reach a verified result.

HUMAN

Outcome • direction • material decisions • acceptance

UBUILDOS™

Plan • build • check • repair • recover • explain

DON'T BELIEVE THE HEADLINE. CHECK THE RECEIPT.

Sources, assumptions, limitations, audit workbook, and exact hashes are included.
